Discussie

- ▶ *Based on the recent developments of EU law, how shall domestic governance and legislation be streamlined in the future in relation to climate change?*
- ▶ *Are new types of plans being required? Does the EU legislator impose new binding targets to Belgium? Does he enlarge the mix of instruments (by comparison with the current one)?*
- ▶ *Does the Regulation on the Governance of the Energy Union and its 'integrated national energy and climate plans' require a radically new approach to planning (adoption, implementation, follow-up) in Belgium?*

15:30 Koffie

Discussie

- ▶ *How does the large public participate today to ‘Climate Governance’, both at EU level and domestic level? Is this participation at odds/in compliance with the requirements of the Aarhus Convention?*
- ▶ *What can we learn from the new dynamics emerging in civil society in order to push the efforts on mitigation and adaptation forward? Is there a need for new types of institutions, in relation to public participation?*
